### Preliminary Findings

21 y/o female who was referred for a 7 day MCOT Study due to diagnosis of Pre-Excitation Syndrome.  
 The patient presented in NSR & Sinus Bradycardia was documented on 4 days of the study & tachycardia was documented on 6 days.  
 1 episode of Non-Sustained V-Tach was documented & included for your review & Delta Waves were documented throughout the study.  
 Thank you for your review.
